

Addressing That Works – When Seconds Count

Because help often arrives from the opposite direction of the mail service, only 50% of your street addresses are visible to 9-1-1 first responders or anyone else.

Don't keep them guessing, identifying your street address on **BOTH** sides of your mailbox using a minimum of 3-inch-high white reflective numbers on a dark background.

House 4-5 inch

If you live in an area that uses community mailboxes rather than individual mailboxes, it is important to display your address on your house using a minimum of 4-inch high numbers that are well illuminated and have a high contrast to the background, both day and night. As an alternate, place a small post with the address sign attached, visible from both sides, and located near the roadside.

DO Use a minimum of 3-inch high white reflective numbers on a dark background.

DO use a directional arrow on the mailbox if you share a driveway with another house or if the mailboxes are all on the same side of the road.

DO display your address ON YOUR HOUSE using a minimum of 4-inch high numbers and make sure they are visible from the street and brightly illuminated.

DO call your local fire department and ask about their addressing guidelines.

DO NOT use black numbers under any circumstance. What color is not visible at night? Black numbers on a white reflective background are common but hard to see at night. The white reflective background has a tendency to balloon from the bright lights of an approaching emergency vehicle and hide the black letters.

DO NOT use brass numbers, they are difficult to see in the daytime and impossible at night.

DO NOT use cursive numbering. 1184 is easier to read than *Eleven Eighty Four*

DO NOT allow shrubbery or holiday decorations to block the address on your mailbox or house.

DO NOT rely on curbside painted numbers. Responders cannot see them as they approach from down the road. The numbers are easily covered by snow, dirt, debris, and completely hidden by a parked car.

Good Addressing Helps Everyone When Seconds Count Don't Keep Them Guessing
